Introduction

Beginning in August 2015, over 35 community organizations participated in the process to develop the 2016-2019 Montgomery County Community Health Improvement Plan (CHIP). Representatives from these organizations were asked to serve as members of the Steering Committee, Stakeholder Group, and/or Workgroups. The community worked together to define a vision statement and select priorities. Using the key findings from the 2014 Community Health Assessment (CHA), the three health priorities selected were *birth outcomes, chronic disease prevention,* and *behavioral health.* Action plans were then created for each priority. These action plans outlined specific goals, objectives, and measures that will be used by the community to address the priorities. Once finalized, the CHIP moved from the Development Phase to the Implementation Phase. Advisory Groups and Implementation Teams were formed to begin putting the plan into action. Implementation of the CHIP began April 2016.

While the CHIP is a community driven and collectively owned health improvement plan, Public Health - Dayton & Montgomery County (PHDMC) is charged with providing administrative support, tracking and collecting data, and reporting implementation progress on a quarterly and annual basis.

This annual report outlines the progress the community has made during the third year of implementation of the 2016-2019 Community Health Improvement Plan.

Vision Statement

**Montgomery County: A Healthy, Safe, and Thriving Community!**

*We believe that all residents of Montgomery County should have:*

~ equal access to resources that promote a healthy lifestyle
~ an environment that promotes health and wellness
~ social support and community connections
~ knowledge about healthy choices and behaviors
What’s Next . . .

The final year of the 2016-2019 Community Health Improvement Plan (CHIP) began in April 2019. For the remainder of the year, the Implementation Teams will continue to work on the goals and objectives identified in the Year 3 Action Plans. The community can find the status of the activities on the CHIP Dashboard located on PHDMC webpage [http://www.phdmc.org/report/community-health-improvement-plan](http://www.phdmc.org/report/community-health-improvement-plan).

Presently, Public Health is completing Montgomery County’s 2019 Community Health Assessment (CHA). Using the data presented in the CHA, stakeholders and community members will prioritize the health issues that will be the focus of the 2020-2022 Community Health Improvement Plan. Once these issues have been identified, Workgroups for each priority will meet to identify measurable goals, objectives, and action steps. These action plans will be developed with the guidance of a contracted facilitator. The completed CHIP will begin implementation in January of 2020.
Priorities and Goals

Birth Outcomes

*Infant Mortality is the key long-term indicator for birth outcomes as well as for overall community health and well-being.*

~ Reduce preterm births
~ Reduce substance misuse in pregnant women
~ Reduce the infant mortality racial disparity

Chronic Disease Prevention

*Regardless of the neighborhood or community in which they live, all residents should have access to safe recreational facilities and healthy food options.*

~ Increase access to safe physical activity opportunities
~ Increase access to healthy foods
~ Decrease tobacco use
~ Increase physical activity and healthy eating in children

Behavioral Health

*Integration of partners - mental health, primary care, public health, and substance abuse – is critical to meet the behavioral health needs and ultimately the overall health of Montgomery County residents.*

~ Ensure access to needed behavioral health services at the right amount, at the right time, for the right person, and in the appropriate setting
~ Increase integration of physical and behavioral healthcare services
~ Enhance care coordination and information sharing across behavioral health and other system partners
~ Reduce the use of opioids and other illicit substances

- Community Overdose Action Team (COAT)
Understanding this Report

The purpose of the Community Health Improvement Plan (CHIP) is to look outside of the work of the individual organizations that often serve only a specific segment of the community and focus instead on the activities that organizations can work on collaboratively that will contribute to overall community health improvement. With that in mind, many of the objectives and action steps associated with the goals and priorities reflect new initiatives that build on the progress that has already been made in each of the priority areas. The action plans are designed to list tasks that require cooperation of several organizations to accomplish the stated goals and objectives.

This annual report, as well as the complete Community Health Improvement Plan, is available on PHDMC’s CHIP webpage, http://www.phdmc.org/report/community-health-improvement-plan. On a quarterly basis, progress will be updated on the CHIP Dashboard which is also available on the CHIP webpage. The complete CHIP Year 3 action plans are available upon request.

On September 28, 2018, the EveryOne Reach One Infant Mortality Task Force held its 2nd Annual Infant Mortality Conference. This year the conference theme was “Kasserian Ingera? How are the Children?” During the day, 267 attendees listened and learned about various topics related to infant mortality.

Five Rivers Health Centers expanded their CenteringPregnancy® program in June 2018. Centering® is now being offered at the Center for Women’s Health (161 Wyoming St.) and the Family Health Center (2261 Philadelphia Dr.).

Baby & Me - Tobacco Free is a smoking cessation program which aims to reduce the use of tobacco products among women during and after their pregnancy. Facilitators of the program are trained to provide counseling support and resources that encourage pregnant women to quit smoking. The number of partners who directly support this program continue to grow.

Montgomery County Food Equity Coalition

Montgomery County is in the process of developing a plan that will be used to address food equity throughout the county.

The purpose of the plan will be to improve food security by:
- addressing the entire food system (food to fork),
- promoting health equity,
- increasing economic development opportunities related to health food, and
- enhancing communication and coordination between agencies and resources.

This plan will use a collective impact structure, engage the community, and utilize measurable goals and objectives.

For the 2019 season, Homefull’s Farm Stands are featuring locally grown produce in various locations around the Dayton area. SNAP-EBT and Produce Perks are accepted at all Farm Stand locations.

The Community Health Centers of Greater Dayton (CHCGD) continues to expand the Behavior Health Services offered to their patients. With the recent addition of a Behavioral Health Director, CHCGD will be developing procedures for integrating substance abuse screening into their practice utilizing the Screening, Brief Intervention, and Referral to Treatment (SBIRT) model.

Screening
The Drug Abuse Screening Test (DAST-10) and Alcohol Use Disorders Identification Test (AUDIT) screening tools will be used to identify high-risk patients. Screening results will be incorporated into their Electronic Health Records (EHR) system and at-risk patients will be flagged accordingly.

Brief Intervention
Upon identification as a high-risk patient, providers will be notified. The provider will engage the patient in a short conversation that will include feedback and advice.

Referral to Treatment
If identified as needing treatment and willing, the patient will be referred to the behavioral health staff and services will either be provided in-house or referred out to the appropriate treatment setting via a warm hand off.

All providers will receive SBIRT training. Also, a comprehensive list of appropriate, reputable treatment providers will be developed to ensure quality referrals for patient population.

The Community Overdose Action Team (COAT) has been recognized both at the state and national levels for its collaborative approach for addressing the opioid crisis. Over the last year, the COAT received three honors acknowledging the collective accomplishments of all its partners.

Achievement Award
presented by the National Association of Counties (NACo)
honors innovative, effective county government programs that strengthen services for residents

2018 Champions of Public Health - “Organization Award”
presented by The Ohio State University College of Public Health.
novel innovative collaborative structure that allows partners to work together in a unified and coordinated way to respond to the opioid crisis

Model Practice
selected by the National Association of County and City Health Officials’ Model Practice Program
demonstration of exemplary and replicable qualities in response to a local public health need
Appendix A

Acknowledgements

Development of the CHIP would not have been possible without the support of representatives from organizations and agencies at the state, county, city, and neighborhood level.
