While presenting data at the county-level provides an overall picture of the health of the residents of Montgomery County, there is a benefit to understanding the population and health characteristics of smaller areas of the county so that place-based programs and policies can be developed.

For the geographic snapshots, Montgomery county was divided into 13 areas which include both cities and townships. Each area is comprised of individual census tracts that have similar population, economic, and educational attainment characteristics.

The following section presents information pertaining to population demographics, income and poverty, education, employment, housing, food access, birth outcomes, mental and behavioral health, and chronic disease for the 13 selected areas of Montgomery County.
Areas in and Surrounding: Union, Clayton, Englewood, Butler Township, and Vandalia
