

COVID-19 Checklist for Out-Of-Network Insurance Coverage

Protecting Against COVID-19

Ohio Department of Health Director Amy Acton, M.D., MPH, strongly recommends that Ohioans are aware of the following information provided by the Ohio Department of Insurance regarding out-of-network insurance coverage specific to COVID-19 testing and treatment.

- Effective March 20, 2020, the Ohio Department of Insurance issued a bulletin defining COVID-19 testing and treatment as emergency services. The bulletin is available at <https://iop-odi-content.s3.amazonaws.com/static/Legal/Bulletins/Documents/2020-05.pdf>.
- Health insurance corporations (HICs) and health maintenance organizations (HMOs) are required to pay for COVID-19 testing and treatment at both in-network and out-of-network hospitals, with no balance bill.
- Other plans that are subject to the Ohio Department of Insurance's jurisdiction are also required to pay for COVID-19 testing and treatment at both in-network and out-of-network hospitals.
 - a. In the case of an out-of-network hospital for these types of plans, the health plan is required to pay what they would typically pay an in-network provider or out-of-network provider, or the Medicare rate – whichever is the greatest.
 - b. As a result, the hospital will be receiving either a market rate or the Medicare rate – whichever is higher. However, the consumer may receive an out-of-network bill that the insurer is not required to pay.
- If consumers receive bills for testing and treatment of COVID-19, they should reach out to the Ohio Department of Insurance at Consumer.Complaint@insurance.ohio.gov to ensure claims are being processed according to the Ohio Department of Insurance guidance.
- The Ohio Department of Insurance does not have regulatory authority over a significant number of health plans in Ohio. As a result, the Ohio Department of Insurance's order does not apply to Medicare, Medicaid, or self-insured employer plans.
