

K-12 Student Quarantine Classroom Guidance

Updated 2/17/21

Public Health - Dayton & Montgomery County recommends that K-12 schools quarantine procedures allow that those students, faculty and staff that may have been exposed to a person with COVID-19 in a classroom setting or on school provided buses, do not need to self-quarantine, provided that the exposure took place in the classroom and all parties where properly wearing face masks.

The above exception ***does not apply to sports or extra-curricular activities.***

All other exposure should follow the standard quarantine procedures. Those exposed, but not quarantined, should continue to monitor themselves for symptoms for 14 days and initiate a self-isolation if any symptoms develop. If unable to complete a 14-day quarantine. Quarantine may also be 10 days without testing or after 7 days and a negative test result after day 5 or later.

Vaccinated persons with an exposure to someone with suspected or confirmed COVID-19 are not required to quarantine if they meet all of the following criteria:

- Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine)
- Are within 3 months following receipt of the last dose in the series
- Have remained asymptomatic since the current COVID-19 exposure

Persons who do not meet all 3 of the above criteria should continue to follow current quarantine guidance after exposure to someone with suspected or confirmed COVID-19.

After quarantine you should watch for symptoms for 14 days after exposure, immediately isolate if you develop symptoms, and continue to wear a mask, stay 6' from others, avoid crowds and wash your hands.
